

50 000 & 1
SEAPs

D2.2 Report of centralised training seminars

FINAL VERSION

Author: CRES

Date: February 2017

Executive Summary

Centralised training has been a key element of the 50000 and 1 SEAPs project, in order to assist Coordinators and Supporters and municipalities through the whole SEAP+EnM process, from decision making to SEAP implementation and monitoring. The Centralised Training Sessions focused on the one hand, on the process of SEAP and Energy Management in the participating municipalities, and on the other, in transferring experience among and beyond the participating supporting structures and municipalities. A key element of the trainings was the presentation of municipal best practices and exchange of experiences. Therefore, in these sessions, experience was not only provided to participants for the further development of the integrated approach at national and local level, but also transferred as feed-back to the consortium to better formulate all relevant tasks. In order to maximise the common potential of European projects and minimise costs, the “50000 and 1 SEAPs” project invited expert Local and Regional Authorities and supporting structures outside the partnership to take part as speakers in the centralised training seminars. This facilitated interaction and knowledge sharing within the consortium.

Three Centralised Training Session were held, with 96 participants in total, representing Local Authorities and LGs

- The first 2-day training seminar was held in Padova, Italy, on 2-3 April 2014. The theme was the outline of the SEAP+Energy Management integration, including previous experience and best practice.
- The second 2-day training seminar was held in Barcelona, Spain, on 1-2 October 2014. The focus was on development of SEAP along with Energy Management.
- The third 1,5-day training seminar was held in Lyon, France, on 19-20 November 2015. The focus was SEAP implementation along with Energy Management,

All trainings were organized by the hosting partner in cooperation with WP2 Leader CRES and the Coordinator Sogesca and were targeted to EnM-SUPPORTERS and EnM-MUNICIPALITIES within and beyond the project.
